Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 2-20 and 23, drawn to a scaffold, classified in class 182, subclass 179.1.
- II. Claim 22, drawn to a method of installing a scaffold deck, classified in class 182, subclass 222.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be installed by gripping both long sides of the deck and not the short side.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
